

# State of Ohio 1999 School District Report Card

## Washington Local School District

### Lucas County

#### Message From the State Board and Department of Education

*Few factors have greater impact on student performance than parent and community involvement. That's why we have prepared this local report card — a "prototype" of the first "official" report card that will be issued in the year 2000. We want to help you learn more about your local schools and encourage you to become actively involved in their efforts to improve. While the report card cannot tell you everything about your school district's performance, it is a good starting point for discussions about how to improve local education results.*

#### What to do with this information:

- ✓ Share your thoughts about the report card with your superintendent, local school board members, principals and teachers.
- ✓ Ask district and school staff for information about what's being done to improve performance — and ask how you can help those efforts.
- ✓ Discuss the report card results with other parents in your community.
- ✓ Review the district's results with your children — so they see how their performance fits into the "big picture."

Inside you will find information about how well your local schools are doing — where they are succeeding and where there is room for improvement.

# HOW WELL DID YOUR DISTRICT PERFORM?

Ohio law calls for each Ohio school district to receive a performance accountability rating based on **18 performance standards** beginning in the year 2000. These 18 standards are **minimum** performance goals for public education in our state.

NOTE: All test scores have been adjusted to reflect higher proficiency test standards that will be in effect by the year 2000.

### Your District Met 8 of the 18 State Standards.

\* No minimum state standards have yet been established for the tests marked with an asterisk (\*). However, state law calls for these tests to be used in determining your district's rating at a future date.

## YOUR DISTRICT'S RATING:

No ratings will be given until 2000

### How The Rating Is Determined

#### Effective

districts meet 17 or more standards.  
(XX districts statewide received this rating.)

#### Continuous Improvement

districts meet 10 - 16 standards.  
(XX districts statewide received this rating.)

#### Academic Watch

districts meet 6 - 9 standards.  
(XX districts statewide received this rating.)

#### Academic Emergency

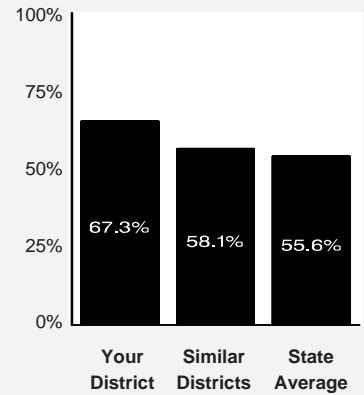

districts meet 5 or fewer standards.  
(XX districts statewide received this rating.)

# NINTH-GRADE PROFICIENCY TEST RESULTS

One important measure of a district's performance is how well students perform on Ohio's Ninth-Grade Proficiency Tests, *which students must pass in order to receive a high school diploma*. The charts on this page show the percentage of ninth-grade students in your district who passed each test, as well as those who passed all required tests.

Your district's passing rate is compared to "similar districts" and to the overall state average. Similar districts were identified based on (1) size; (2) poverty level; (3) family income, education levels and professions; (4) factors related to urban or rural location; and (5) district property tax wealth. For a list of the districts in your comparison group, see the note below.\*

# STATE PROFICIENCY TESTS — DISTRICT RESULTS

Proficiency tests are given each year to Ohio students in grades 4, 6, 9 and 12 to test their knowledge and skills in core subject areas. *All test scores shown on these pages have been adjusted to reflect higher proficiency test standards that will be in effect by the year 2000.*

## Performance Targets and Comparisons

Minimum state *Performance Standards* have been established by the Ohio General Assembly. These columns show how well your district performed in comparison to “similar districts” and to the overall state average. For similar districts, the average passing rate and the highest passing rate in the group are provided. Similar districts were identified based on size; poverty level; income, education levels and professions; factors related to urban or rural location; and property tax wealth. For a list of the districts in your comparison group, see the note at the bottom of page 3.

## QUESTIONS TO DISCUSS IN YOUR COMMUNITY

- ✓ Is your district achieving the state’s minimum performance standards?
- ✓ Has your district’s performance improved or declined over the last 3 years? (See page 5.)
- ✓ How is your district doing compared to other districts with similar characteristics?
- ✓ What efforts are under way to improve areas where results are not satisfactory — or where the district is not improving?

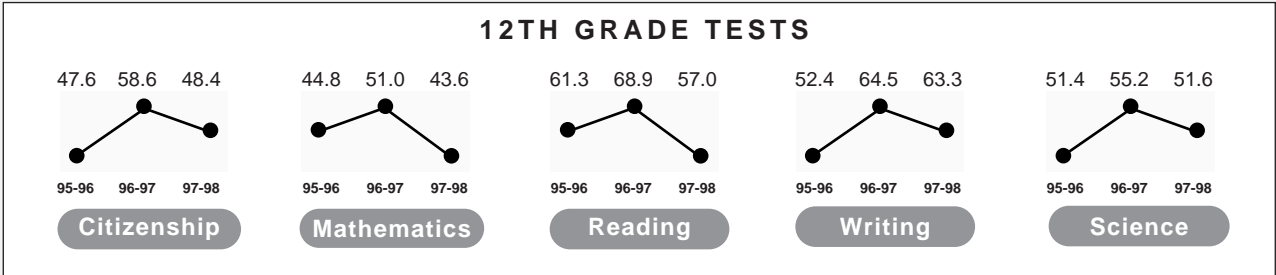

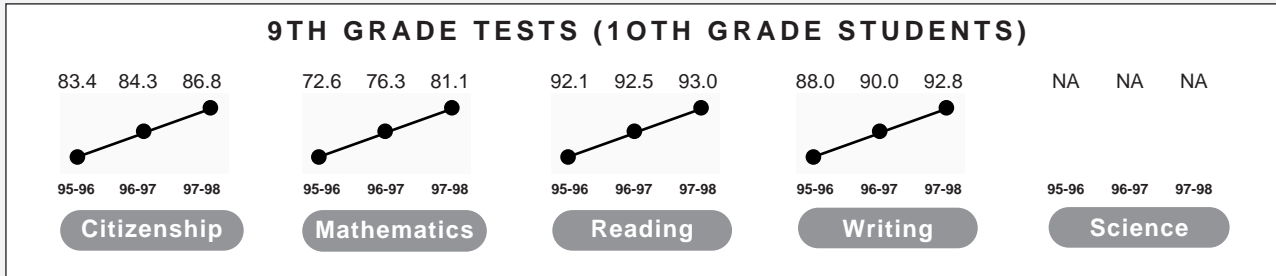

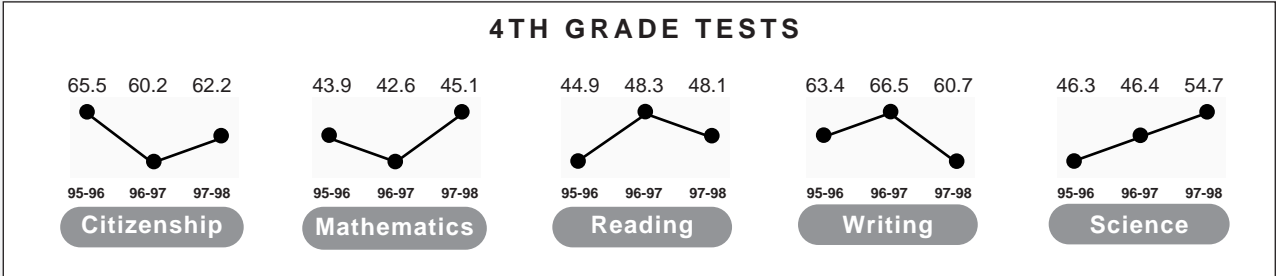

NS = No standard. NA = Not available. NR = Not reported by the district. NC = Not calculated for fewer than 10 students.

# YOUR DISTRICT'S 3-YEAR PERFORMANCE TRENDS

The lines on this page show your district's results on state proficiency tests for each of the last three years. This information can

help you see whether performance in these areas is improving or declining over time.

## PERCENTAGE OF STUDENTS WHO PASSED THE TESTS

NOTE: These graphs are not drawn to scale. The graph for each test is designed to show a general trend for that specific test.

# A CLOSER LOOK AT PERFORMANCE RESULTS

Looking at the performance results of different groups of students provides a more complete picture of your district's overall performance. You may obtain performance results for a specific gender or ethnic group by visiting the Ohio Department of Education's web site (<http://www.ode.ohio.gov>) or by calling (877) 772-7771.

		All Students		Students With Disabilities		
		This column allows you to compare the percentage of all students in the district who were required to take the state proficiency tests to the percentage of students who actually took the tests.		It is expected that all students will take the state proficiency tests. In some cases, however, an individual student with a disability may be exempted from taking one or more of the tests. These exemptions are made, on a student-by-student basis, by a joint decision of the student's parents, teachers and school administrators.

## QUESTIONS TO DISCUSS IN YOUR COMMUNITY

✓ Are most students in your district required to take the tests? Are most students actually taking the tests? Why or why not?

✓ Are students with disabilities participating and performing at satisfactory levels?

NS = No standard. NA = Not available. NR = Not reported by the district. NC = Not calculated for fewer than 10 students.

# ATTENDANCE, DISCIPLINE, PROMOTION AND GRADUATION

School environment directly impacts learning, test scores and achievement. Students who attend school everyday — and who learn in a safe and orderly setting — are more likely to do better than students who do not.
