

### Talking Points!!

- We love this app, and we encourage you to use it!! Of course, if you are finding success with Class Dojo or some other app that also translates, go ahead with what you are comfortable with! It is an easy download from your App Store; just search “Talking Points for Teachers.” You can also access it on a desktop at [talkingpts.org](http://talkingpts.org). Once you have names and phone numbers added, this app allows you to text your ELL families easily - you send a message in English and it goes to them directly as a text message in their Home Language (HL). They can respond in their HL, but it comes directly to you in English. Additionally, it works through your email address, so your personal phone number is never used or shared.
